Growth Ready

Responding rapidly to dynamic business requirements has always been an essential mission for IT managers and their teams. When you can readily say yes to innovation, make life easier for users, and improve productivity for the business, everyone wins.

At Data#3, we make it our mission to ensure our customers can say yes. Yes to mobility and to Cloud. Yes to increased agility, continued innovation and speed to market, without compromising on security.

Flexibility, responsiveness and speed to market are the hallmarks of successful businesses in the digital age. This means equipping your organisation and your employees with the productivity tools needed to compete in an economy that is 'always on'.

For a faster, smarter way to reduce existing constraints and accelerate Cloud and mobility initiatives, we recommend Windows 10.

To help your business meet current and future business requirements and IT priorities, Data#3 proposes an investment in Windows 10 as a means to:

- Deliver a faster and more cost effective way to embrace Cloud computing, deploy mobile devices and better secure access and applications.
- Reduce the time invested in management of diverse networks, mobile devices and compatibility resolution.
- Enhance productivity toolsets and improve the self-service capabilities that IT teams can offer to the business.

Business Requirement

Greater productivity

Improved operational efficiency
and reduced capital expenditure

More responsiveness, fewer IT bottlenecks

Protection of company reputation and brand

IT Priority

Design and accelerate mobility initiatives to support cross-device and platform workflows

Focus more IT resource on strategic initiatives, accelerate Cloud enablement, reduce time and budget spent on tactical management

Enhance Self-Service

Continuous improvements to the management of foreseeable information and data security risks

Rock Solid Reasons to Migrate

Simplified cloud integration, fully encrypted mobile data, and better ways for users to harness the productivity of emerging devices and applications are just a few of the reasons to migrate to Windows 10.

01 Providing expanding Mobile Device Management policies for corporate and personal devices

02 Enabling lock down of devices to specific applications

03 Delivering full mobile encryption of data without compromising network or application security

Manageable

Improve operational efficiencies with a single, simple management platform for all mobile devices and access controls.

Automatic updates and patching reduces tactical management task sets.

Easier to set up and control onsite or remote self-enrollment and un-enrollment of corporate or personal devices to the company network. Automatic removal of company configurations and applications on un-enrollment.

Support users anywhere in the world through Azure Active Directory integration.

Productive

Enhanced voice and gesture interaction with devices, including the introduction of Cortana voice integration with OneNote and Office365.

Complete hands free management of documents, calendars, emails and search functionality.

Enable seamless transition of information between desktop, mobile and tablet devices for better user experience and workflow preferences.

Grant full access to resources, updates and maintenance, and maintain full control over access and file wipe for BYOD devices.

Secure

Expanded enterprise and Cloud computing administrator tools give devices and data the latest protection.

Biometric user recognition for fully personalised device access.

Continual upgrades to reduce unpatched attack vectors within the business.

Data encryption through Bitlocker Drive to render device data inaccessible to 3rd party.

End-to-end encryption between compute devices and Cloud services such as Azure Active Directory.

A Faster, Smarter Way to Work

Windows 10 is a better way to enable The Anywhere Workplace.

It is easier for IT managers to deploy, scale and manage devices for mobile and Cloud access for users, no matter where they are, what device they are on, or which applications they need to access. Devices can be quickly configured to suit user profiles within the business; full time, part time, casual, contractor, freelance, corporate device or BYOD.

Make the Move

The following offers are available to support your move to Windows 10.

Windows 10 Enterprise Proof of Concept

If you're unfamiliar with Windows 10 and would like to explore its capabilities and options with Data#3, this 2-day Proof of Concept program is your ideal starting point. This program offers a series of technical briefs and well as hands-on labs so you experience Windows 10 for yourself.

Windows 10 Enterprise Pilot

For organisations who have made the decision to migrate to Windows 10, this Pilot Program is an ideal step to deployment. Built on the experience gained in Data#3's own deployment, this 10 day program will guide you through the processes and solutions involved in deploying Windows 10 as well as ongoing management.

Next Steps

The list of benefits that Windows 10 offers businesses and IT teams far exceeds the highlights noted in this document.

Much more than a refresh of previous Microsoft Operating Systems, Windows 10 positions IT managers and their teams to devote more time to strategically valuable initiatives, and spend less on tactical maintenance issues.

Read on to see why you should choose Data#3 as your partner for Windows 10.

Case Study

Data#3 is helping The Department of Agriculture and Fisheries leverage Windows 10 to reach their organisational objectives and create a sustainable technology future. [Read the case study here.](#)

Shift to Data#3

Recognised Excellence

Data#3 is globally recognised by Microsoft as a leader in devices and deployment. A worldwide award finalist in Devices and Deployment 2014 and 2015, Data#3 holds Microsoft Gold Competencies in Cloud Productivity, Cloud Platform and Devices and Deployment.

SOE Expertise

Data#3 has a long history of SOE expertise in development and deployment. Our expertise comes from our extensive Microsoft specialist resources and the years of experience from both our customer and our own internal deployments.

Deployment Flexibility and Scalability

Data#3 is one of the largest Microsoft device resellers in Australia. With local integration centres in Brisbane, Sydney and Melbourne, we are able to offer deployment options right through to white glove delivery to desk.

Device Infrastructural Support

Data#3 has the expertise and ability to execute peripheral projects which support a device rollout/upgrade. This includes device management solutions and networking – including wireless infrastructure.

User Adoption

Unlock the full potential of your technology investment and improve user engagement and satisfaction with Business Productivity solutions from Data#3.

Conclusion

If your business is ready to focus on accelerating mobility and cloud initiatives to reduce costs, improve productivity and provide a workplace user experience that will attract and support top performers, it's time to shift to Windows 10.

Let Data#3 assist you explore the benefits of Windows 10 in greater detail and discuss these in specific relation to your business and technology environment. [Speak to us today.](#)
